Introduction :

Redbird coin is an open source, peer-to-peer, community driven decentralized cryptocurrency that allows people to store and invest their wealth in a non-government controlled currency, and even earn a substantial interest on investment. This means anyone holding Redbird coin in their wallet will receive interest on their balance in return for helping maintain security of the network.

Moreover, apart from lending, it solves the core problem of daily use in the domain of travel, accommodation, rental for home and any products and services. In our everyday life, we book and rent many products and services which requires us to exchange not only fiat currency but also our private information in exchange of goods and services.

Our primary focus is on accommodation and rental products and services for the following problems defined in use case:

-

PROBLEM AS IS SCENARIO Individual User:

Bob lives in SPAIN gets a new job in Berlin very first thing Bob does is to book a rental apartment via online rental/hotels sites where he registers and shares his personal and bank information. Next he books Car or Bike to make this commutation for job and visit city, here again he shares his personal information to rental agencies. Now Bob want to move from high hotel/rental to cheap rental room and also looking for flatmates in new city, he registers on various local sites which post daily room ads to use this services he again shared his personal and bank information to contacted tenants. Hence after wasting lot of time with plenty of emails and calls with various tenants, he finally got luckily to schedule appointment with one tenant, there again he shared his personal documents and bank details, unfortunately tenant broke the deal and took some other flatmate even after commitment. Bob again started the search for new tenant. He schedule appointment with one more tenant, where tenant ask him to pay 1 month deposit before hand, Bob was naive and paid the deposit, later he was never called and contacted by tenant . Bob was SCAMMED by tenant!

Bob again started his search for new tenant and this time he was lucky to get right tenant but with only for 3 months of rental contract with condition of 1-2 months advance deposit and advance rental. However after 3 months Bob contract was terminated and he moved to new the house, but TENANT took the opportunity knowing that he non-native, his claim for deposit was denied on claim of for making mess and breaks during his stay and while moving out. BOB was somewhat SCAMMED with his deposit.

PROBLEM AS IS SCENARIO Individual Tennent & Rental Agencies:

Thomas is live in Berlin with addition spare room, he is always short of cash at end of month due to high cost of living, it is also problem for him to find trusted short term flatmate or individual to which he can rent shared space and earn some money to maintain his standard of living.

Also due to city council rules which is extremely difficulty to keep someone for short rental. Moreover he also fly frequently to Poland to meet his girlfriend hence his room too is vacate during weekend. Thomas expense of living is getting higher due to travel he is too depressed because of high cost and he can't meet his girlfriends frequently too.

Thomas is also worried on keeping someone for rent even for spare room due to trust factor, also he has fear that any additional earning will become part of tax and easily visible as financial gain to tax authority.

SOLUTION TO BE SCENARIO User:

Bob is smart crypto currency user and firm believer in Redbird Coin, respect his right to privacy and want to live hassle free life during travel and relocation. Bob lives in SPAIN gets a new job in Berlin, this time he took apartment via onlie rental service or other rental platforms which accept Redbird Coin as payment which integrate identity and transaction privacy so that he can monitor, share, grant and revoked access to personal information with rental party and tenants.

Now Bob can select from the listed private space on Redbird app during his vacation or relocation without been scam or worry to take load of cash and also do not have to worry about currency exchange, he can use Redbird coin app to pay his rent and deposit (house and keys), his deposit is locked for the contract period and automatically refunded when rental ends.

In case of dispute on deposit with Tennent jury will decide the case based on evidence from both party with 5% of fees.

SOLUTION TO BE SCENARIO Individual Tennent & Rental Agencies:

Thomas is smart crypto currency user and firm believer in Redbird Coin. He lives in Berlin rich old town area and never worried about paying high rent, he list his private space on Redbird app and uses Redbird coin for taking rent and deposit, during rental period he not only get the rent but also stacking profit from the deposit he got for renting his spare room. Now he enjoy double profit rent and stacking from deposit.

Whenever he visit Poland for weekend he can now find quick trusted roommate for weekends via Redbird app and earn additional money during this travel for spare room and also his personal room too.

Thomas, can also select rental with insurance option to safe guard his home for any theft or by using Redbird platform with very little fees.

Now Thomas earns loads of money with stacking deposit and renting his room without worry about city council rule as all transaction are private and with use of Redbird visa card he can shop and enjoy more.

Features:

- **Transfer instant Peer to Peer** : The data is not kept on a single server but is shared among all the users, it means that decentralized exchange cannot be takedown even by government. Redbird coin runs without having a central server. The storage server is decentralized and distributed-divided into various servers run by each user connected to the network.
- **Redbird coin Safe transactions are Anonymous** : There is no 3rd party you have to entrust your money, each user holds the private keys of their coins. Multi-signature gateway software that protects the network from unauthorized transactions. Here transactions are anonymous and user can control its privacy to make it visible, however all of his transactions are still recorded and can be monitored through block chain as anonymous user.
- **Transfer Money Easily** : Just like Bitcoin, it can be sent anywhere in seconds, whenever and wherever you want. Money transfer with Redbird coin happen only with a smartphone's and internet connection..

Features:

- **Tiny Transfer fee** : You can set the cost in Redbird coin wallet or app as needed no matter how much coin is sent. No transfer fee between user of Redbird coin App and Redbird coin wallet.
- **Limited coin supply**: Redbird coin supply will only be 20million coins worldwide, this resembles an economic system based on deflation and with increasing supply coin, It's prices tend to rise, when demand is high and the number of coins that remain is not increased.
- **Easier to stack & mine, easier to understand**: With Redbird coin supply of 20 million coins we've made it easier to mine coins using QT and Mobile Wallet
- **Development Team**: Strong Development Team with Support everyone with mighty 10 year of experience working in silicon valley.
- **NO HYIP**: We are not HYIP full of unrealistic returns, we are here to solve major day to day issue during travel for renting and lending of products and services.

Features:

- Referral Program : 3 levels + 1 Platinum level
- Exchange: Will be soon listed on at least 2 external exchanges.
- Payment: Visa and Mastercard for first 1000 promoters and investor during lunch of rental payment system in year 2018-2019.
- Rental Insurance: Redbird coin app will allow listing for private space with insurance facility to safe guard tenant home.
- Guard Rental Deposit: Redbird coin app will allow renting spare space with safe guard to despsit amount paid for home and keys.
- Transparency & Speed: All deposits, withdrawals, and order books will be stored on the blockchain. There is no place for exchanges manipulation. We plan to project a blockchain that can process up to 100.000 transactions per second with an average confirmation time of just 5 seconds.

Redbird coin has many opportunities of investment:

Lending

Stacking

Trading

Mining

Renting

Payment

Redbird Coin Lending:

This is a very interesting concept for passive investors and extremely suitable with those who are looking for investment opportunities without calculating profit collected from their investment.

LENDING AMOUNT	LENDING AMOUNT	LENDING AMOUNT	LENDING AMOUNT
\$100 to \$1,000	\$1,010 to \$5,000	\$5,010 to \$10,000	\$10,010 to \$100,000
INTEREST (Up to 45% per month)	INTEREST (Up to 45% per month)	INTEREST (Up to 45% per month)	INTEREST (Up to 45% per month)
Volatility daily	Volatility daily +0,10 % daily	Volatility daily +0,20 % daily	Volatility daily +0,25 % daily
Capital Back After 170 days	Capital Back After 140 days	Capital Back After 110 days	Capital Back After 80 days

Redbird Coin Trading:

This option is also rather potential for investors although the profit margin is not equal to lending. But with a stable development trend, this is still a profitable investment opportunity.

Redbird Coin Stacking:

If you are a person who is really busy, consider this option. It will bring you considerable profit from hoarding Redbird Coin.

Redbird Coin Mining:

Earning income from mining for Redbird Coin Mining. This is the final way out of the above methods to be able to earn profit by mining. We provide POW algorithms so people can mine with the amount of coin we permit.

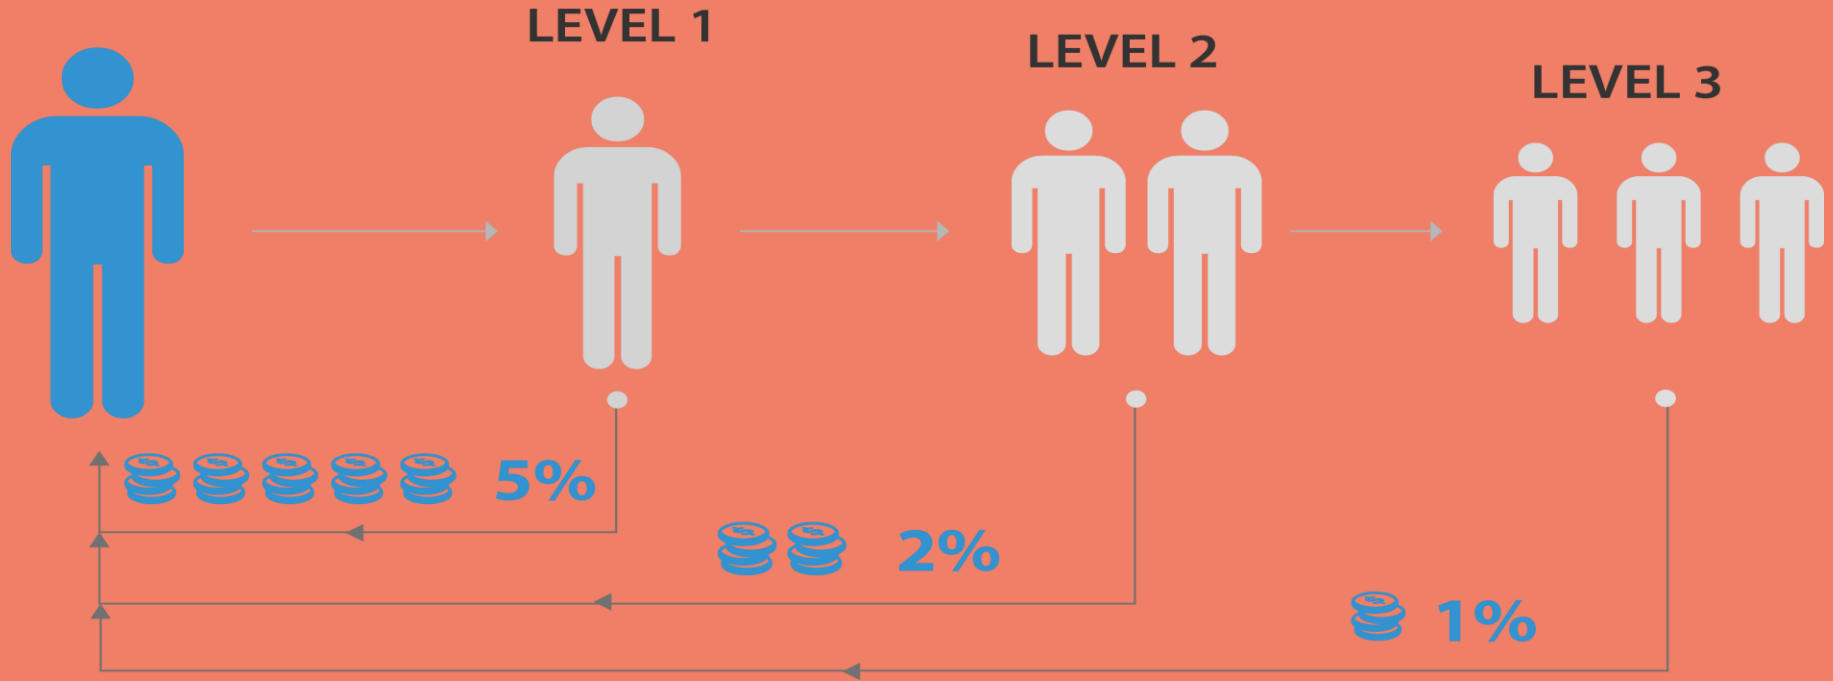

Payment, Renting Service and Products

User and service provide, renter and Tennent all can enjoy passive earning and with cash free, secured encrypted trade of service, products and goods between like claiming rent, deposit, stacking deposits

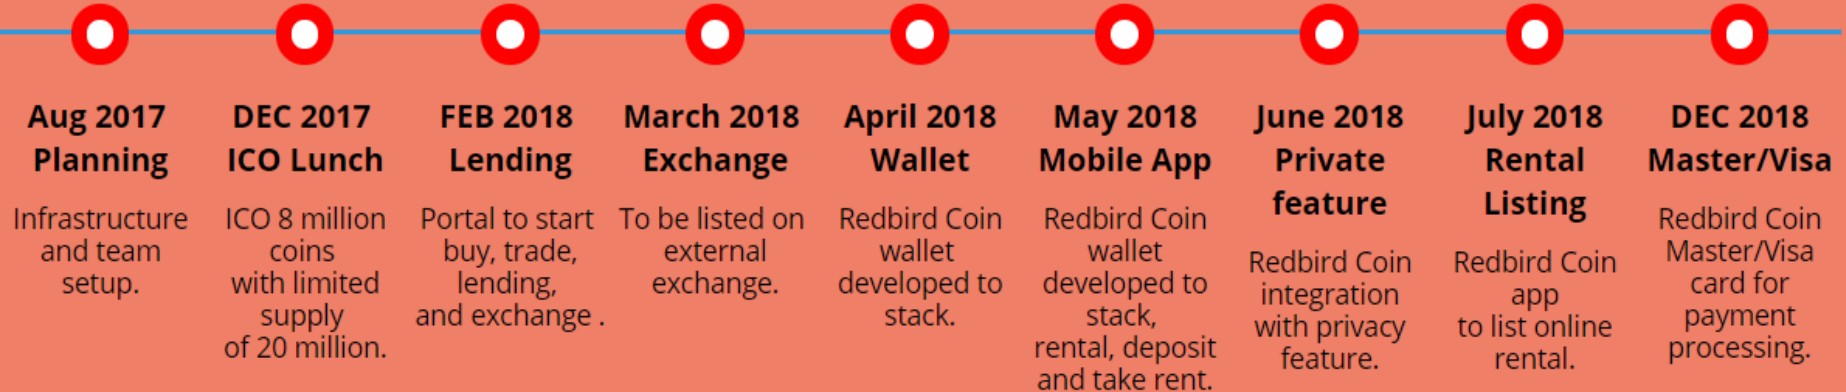

Opportunity to earn profit via the network:

Redbird referral system that allows members to refer it to other investors and earn income from commission of investments. So to earn profit, members will share and introduce their network to as many investors as possible.
